

AIR MAKE UP UNIT

REYCO Systems® Air Make-Up Units (AMU) are manufactured to the highest quality standards to operate in some of the most difficult food processing environments. We established our reputation in the extreme conditions of the French fry industry and continue to build on that success. REYCO Air Make-up Units are designed to last far longer than a typical HVAC system, on the order of thirty years or more. REYCO manufactures GasPacs for heat, CoolPacs for refrigeration, VentPacs to provide evaporative cooling and AmPacs when a clean, filtered air supply is required. All are available with optional Steril-Aire™ UVC technology to decontaminate incoming air prior to entering your facility.

- Available with Steril-Aire™ brand UVC decontamination emitters to maintain cooling coils in energy efficient “like new” condition and kill microbes in fly-by.
- Cooling coils available include ammonia, and freon in addition to steam and glycol for heat recovery and redistribution.

- Custom built Air Make-up Units from 5,000 to 125,000 cfm.
- Natural Gas fired for efficient tempering of the air.
- Optional evaporative cooling for reduced energy use versus refrigeration.

- Integrated support frame base complete with lifting eyes.
- Available with a wide variety of filter mixes from disposable box to washable aluminum and ultra fine HEPA filtration.
- All stainless steel and washdown construction is available.

1870 W Franklin Road, Meridian, ID, 83642.
